

SOUTH CENTRAL INDIANA REMC
Load Management Program
Consent Form

CONSENT TO INSTALL LOAD MANAGEMENT DEVICE

I consent and agree to have a Load Management Receiver device installed on my electric water heater for the purpose of reducing the kilowatt demand during South Central Indiana REMC's system peak load situations. The load management receiver will be installed prior to the end of 2010.

I understand that there will be no charge to me for the equipment, its installation or removal, and that the equipment shall remain the property of SCI REMC.

I agree to permit SCI REMC employees and its contractors to come on my premises at reasonable hours and with prior notice to install the Load Management Receiver device, to conduct maintenance, and to replace the control receiver as necessary.

I understand that the water heater will be controlled in a diligent and reasonable manner with minimal or no inconvenience to me.

What systems do you want on the load control program?

(At this time, we will not be putting the load management device on a geothermal system.)

Choose all that apply.

Air Conditioning

- Heat Pump
Central Air
Geothermal (does not apply)

Water Heater

- 50 gallon electric (or higher)
Gas water heater (does not apply)

If you are picking up a water heater when will it be installed? \_\_\_\_\_

(We do require the water heater to be installed within 30 days from time of pick-up.)
