

South Central Indiana REMC

Service Installation Agreement

This agreement is entered by and between South Central Indiana REMC, hereinafter called "REMC" and _____ hereinafter called "Member". The purpose of this agreement is to state clearly the responsibilities and liabilities of the parties hereto.

The parties agree as follows:

1. Member, or his authorized agent, shall open and expose existing underground utilities, water or septic lines, and other underground facilities, or properly locate and mark such facilities before the installation of service shall commence. "Pointing" to, or indicating approximate locations of existing facilities shall not be considered acceptable practices. **The REMC will not be responsible and will be held harmless for all damage to any underground installations that have not been exposed or properly located before any digging or trenching.**
2. When trenching is required, the area crossed by the underground trench is to be within six (6) inches of final grade prior to the installation of the underground service. **Relocation of installed underground facilities necessary as a result of improper grade shall be billed at 100% of cost.**
3. REMC will backfill opened trench by mechanical means without "tamping" as best that can be done at the time the service is installed. **Any further need of trench filling will be the obligation and duty of the Member.**

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals.
