ENERGY EXPLORERS DAY CAMP 2026

SCI REMC's annual one-day camp is free for SCI REMC members and SCI Fiber subscribers.

South Central Indiana REMC is excited to host its annual Energy Explorers Day Camp for **students entering fourth through sixth grade**. This free one-day camp gives students the opportunity to learn more about their electric cooperative through hands-on activities, interactive demonstrations, and educational experiences designed to make learning about electricity fun and engaging.

Students will spend the day exploring the many ways SCI REMC serves the community while participating in exciting activities such as live line safety demonstrations, bucket truck rides, department-led activities, and more. Students will also have the chance to meet SCI REMC employees and learn about the different roles in electric and fiber within the organization.

Energy Explorers Day Camp will take place Friday, June 26, 2026, from 9 a.m. to 3 p.m., with lunch provided.

Participation is open to students whose parents or guardians are SCI REMC members or SCI Fiber subscribers. Space is limited to 40 students, and **registration closes Friday, June 19, 2026.**

Scan the QR code to sign up for our 2026 Energy Explorers Day Camp.

Consider Electrical Safety Before and During Your Vacation

A FEW SMALL ACTIONS CAN REDUCE ELECTRICAL RISKS WHILE TRAVELING

At Home Before You Leave

Use programmable timers or motion-sensing lighting to create the appearance that someone is home without keeping lights on constantly.

Unplug nonessential appliances and electronics such as coffee makers, toasters, televisions, and entertainment systems.

Inspect cords and outlets for frayed wires, cracks, or loose connections, and address any issues before traveling.

While You Are Away

When staying in a hotel, condo, or short-term rental, take a moment to check for potential hazards.

Look for overloaded outlets, excessive use of extension cords, outlets that feel warm, or unusual odors that could indicate overheating.

If you notice a concern, report it to management. If the issue is not resolved, consider finding another place to stay.

On the Road

If you are involved in a crash that brings down a utility pole or power lines, remain inside your vehicle.

Downed lines may still be energized and pose a serious risk of electrocution. Warn others to stay away, and call 911. Only exit the vehicle when emergency responders confirm it is safe.

PLUG INTO SAFETY

DIRECTOR PETITIONS NOW AVAILABLE

SCI REMC members interested in serving on the SCI REMC Board of Directors may pick up a petition beginning May 29. Completed petitions must be submitted by July 27.

Board seats up for election this year include:

- District 1
- District 5
- District 9

For additional information, contact Stacey Sauer at 800.264.7362, ext. 111.
